Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The disclosure should be carefully reviewed to ensure that any and all grammatical, idiomatic, and spelling or other minor errors are corrected.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10, 13-19 and 21-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Nowak et al. (US 6,121,755). The reference discloses a battery charger state indicator having a light source 35 for emitting light through an electrolyte. Column 4, lines 25-30. An optical element configured to determined the charge state of the electrolyte. Column 4, lines 35-43. The liquid maybe a sulfuric acid. Column 3, lines 30-35. The light is angled through different barrier surface 50, 55 so it is not directly travels to the sensor. See figure 4. A processor is used to determined the charge state. Column 4, lines 50-53.

Art Unit: 2838

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11, 12 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nowak et al. (US 6,121,755) in view of Patis (US 4,350,885). Reference '755 does not use specific gravity measurement with its light source. However it is possible to use light to measure the specific gravity of a liquid as taught by reference '855. The advantage is its usefulness in remote location. Column 4, lines 60-64. It would have been obvious to one having ordinary skill in the art to have incorporated the feature of '855 into the device of '755 for the purpose of determining a different property of the battery so a user has a better knowledge of the state of battery.
